

# THE BURLINGTON BARK

Burlington, Iowa | Feb. 1, 2023

Bus driver Linda Junker welcomes aboard seventh-grader Christoff "C.J." Sewell Monday, Jan. 9, 2023, outside Edward Stone Middle School.

## BCSD BUS DRIVERS MAKE AN IMPACT

**Bus drivers serve as consistent presence in students' lives.**

Linda Junker's face lights up as she rises to greet her riders aboard Bus No. 17.

She welcomes each of them by name, asks about their day and waits patiently while they place their bags on the floor and make their way to their seats.

She looks back and forth between rearview mirrors and

the road ahead as she eases the 35-foot-long vehicle into traffic, all the while managing to keep a watchful eye on her passengers.

The next two hours hold no shortage of tight turns, narrow roadways, or distractions, but Junker takes it all in stride.

"You just have to get over your fear of driving something really really big," Junker said with a grin.

Junker conquered that fear long ago, having first started driving for the Burlington Community School District in 1979. She retired briefly in 2014 but returned that same year.

"They needed the help so bad that I came back," Junker said.

What initially attracted Junker to the job was its schedule, which coincided perfectly with that of her children's schools.

"When I started here, we had

Bus driver Linda Junker waits for passengers to board her bus Monday, Jan. 9, 2023, outside Edward Stone Middle School.

no men drivers," Junker recalled. "None. It was all women, and most of us were young moms. It was a good job because we knew that we work and then our kids go to school."

Now, men make up nearly half of the 27 drivers who gather at the bus barn each morning and afternoon before boarding their buses and driving their routes, which amount to a total of 1,898 miles. Among those men are Junker's son, Jason.

"He was about 6 or 7 when I started driving," Junker said. "He used to go with me when

he was a kid and he loved it."

The demographics of the job may have changed, but Junker's memory and compassion for her passengers have not. She can still recall the names and faces of riders who graduated long ago, the dogs who waited outside to welcome them back home after a long day at school, and how bad or mild the winter was that year.

She keeps in tow a blanket for a rider prone to the cold, and tucked away near her seat is a notebook full of tips and advice for substitutes on the rare

days she cannot work.

"All these kids, every one we've got in here, I've had when they were little," she said.

At each drop-off, Junker waits until she sees her riders enter their homes before departing for the next stop.

Once all of her middle schoolers are safely home, she makes her way to Grimes Elementary School to pick up a trio of riders who like to sing. It's something Junker encourages while she helps those who need it to their seats.

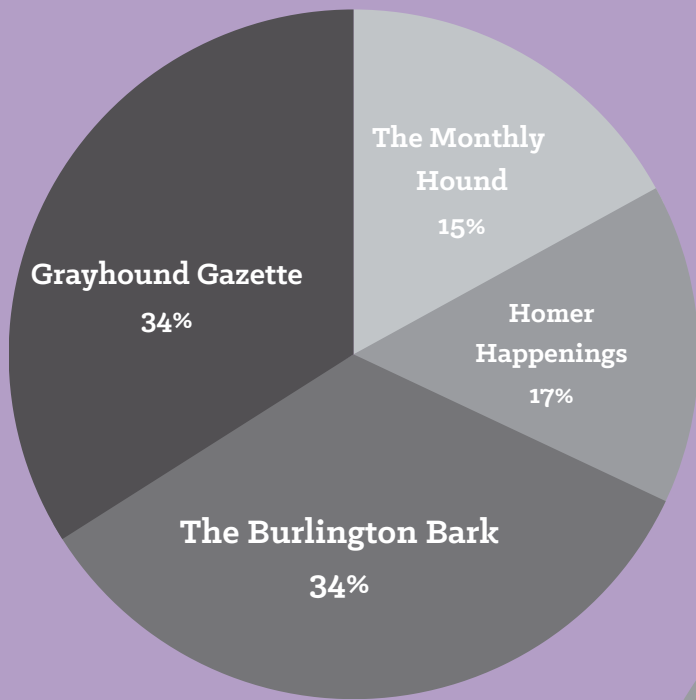

One of those students, Junker noted, soon will go on to middle school and no longer will be on her route.

"I've got him for one more year, and then he'll go to Aldo," she said, explaining that her bonds with her riders have made it difficult to decide when to finally retire. "I don't know what I'm going to do. When the time comes and I do end up retiring, I'm going to miss these kids terribly."

## DRIVERS

Continued from page 2

Likewise, Transportation Director Scott Mason said bus drivers play an important role in the lives of the children they serve.

“Our staff is phenomenal ... They are professionals who drive because they love interacting with kids and making an

impact,” Mason said. “They are great employees and even better people.

“We share the belief that there is something special about being the first BCSD face kids see in the morning and the last they see in the afternoon.

“There is an impact that can be made just by being dependable; kids yearn for stability and knowing they get to see the smiling face of their

morning or afternoon driver may be something kids come to depend upon. The staff believes this, too, and represents all of us in the best way possible.”

This year, about 1,200 students ride BCSD buses.

Mason said substitute bus drivers are always needed and encouraged those seeking fulfillment to consider giving it a try.

“If you are recently retired, and you are looking for something where you can have a direct impact on someone or something, I would encourage you to think about becoming a substitute,” Mason said.

“Kids sincerely want adults to care about them, so if anyone finds themselves looking for a way to influence a younger generation, this might just be a good way to do it.”

## FROM MENTEE TO MENTOR

# A GENERATIONAL EFFECT TAKES SHAPE AT CLUB M

### BCSD's one-on-one mentoring program enters eighth year.

Each Wednesday afternoon, elementary students rush into the cafeteria of Burlington High School, eager to spend an hour with their mentors.

Six years ago, Kiera Wagler, now 17 and a junior at BHS, was among the elementary mentees enrolled in Club M, the Burlington Community School District's one-on-one mentoring program that matches K-4th grade students with high schoolers based on interests and personalities.

"It was just nice to have someone who was older than me but not an adult that I was able to hang out with," Wagler recalled.

It was something she looked forward to each week, but between extracurricular activities, academic responsibilities and after-school jobs, high schoolers are busy, and Wagler estimates she had three or four mentors in a single year.

"I went through mentor after mentor," she said. "I would have a mentor who would show up for a while and then stop showing up, so I never had one solid mentor through a whole year, and I wanted to be able to be there for someone through a whole year."

That's why Wagler rejoined Club M her freshman year, this time as a mentor.

"I wanted to be able to be that

**Burlington High School junior and Club M mentor Brooklyn Rice reaches for a Lego while playing with her mentee, Ryden Ward, a second-grader at North Hill Elementary School, Wednesday, Jan. 11, 2023, in the BHS cafeteria. Rice is among seven mentors who first joined Club M as mentees.**

#### Become a mentor

person that I wanted to have when I was that child," Wagler said. "I wanted to be a staple of their life that's there weekly and that they can trust."

She's become just that for Kylie Curry, 9, a fourth-grader at Grimes Elementary School, who is in her second year as Wagler's mentee.

"She's nice and she's funny, and she likes playing the things that I do," Curry said. "Sometimes she complains about playing tag, but she'll get over it."

Despite having a part-time job

and homework, Wagler still makes it a priority to spend a portion of her Wednesday afternoon in the high school cafeteria or in the courtyard, where Curry will talk her into playing a game of tag.

"I really like my mentee, so it's really easy to take time out of my week when I have something to look forward to," Wagler said.

Next year, Wagler will have a new mentee as Curry is in her final year of elementary school, but she hopes to have a positive impact on whomever her next match may be.

"It'll be new and different, but I'm hoping I can somehow make an impact on their life in the little time I'll have with them," Wagler said.

Wagler is one of seven mentees-turned-mentors who were presented with a Club M mug and picture frame this past month in recognition of their commitment to the program — and their young peers.

That's not to say that Club M's other mentors are without dedication.

About 52 high school mentors show up for the program each week in hopes of having a profoundly positive impact on the lives of their respective mentees.

"I just really like working with kids, and it's really nice to be such an important person in their life and be someone they look up to," 15-year-old

freshman Shannon Skeens said while molding Play-Doh into figures alongside two of her fellow mentors and their mentees.

"I like that I get to be an inspiration to younger kids," said 14-year-old freshman Isha Salokhe.

### About Club M

Club M meets from 3:30 to 4:30 p.m. each Wednesday during the school year, save for days when there is no school.

The program is in its eighth year at BCSD.

That's 250 hours of peer mentoring, with more than 150 students served each year.

This past summer, the program was re-certified for an additional three years through the Iowa Mentoring Partnership based on the National Quality Mentoring System's best practice standards.

"Everything we do goes back to that vision of having a profoundly positive impact on adult quality of life, and having Club M as part of that experience in our schools definitely goes toward that," Cassie Gerst, BCSD Supervisor of Grants and Community Outreach, told the Burlington School Board during its first meeting in January, which is National Mentoring Month.

Club M is aimed at improving self regulation and executive functioning skills, the mental processes that enable planning, focusing attention, memory and multitasking. It also helps build social skills.

Surveys completed by Club M mentees at the beginning and end of the year indicate an increase in confidence regarding

their ability to graduate high school and college.

Gerst said the program also has enabled the formation of friendships between students from different schools who

otherwise may not have met until at least fifth grade.

The program also has a positive impact on mentors, with 92% of mentors either agreeing or strongly agreeing that Club M

helps them to be better role models and 68% indicating that Club M helped them think about their own future.

"THIS IS LIKE WHAT PEOPLE WHO DO IT AS A JOB USE. IT GIVES KIDS EXPERIENCE WITH PROFESSIONAL TOOLS, AND I THINK THAT'S REALLY IMPORTANT."

— NORAH BELL —

Sophomore Norah Bell, 15, works on a project using one of eight XP Pen monitors now available to art students Friday, Jan. 27, 2023, in Anthony Onesto's classroom at Burlington High School.

## ART STUDENTS GO DIGITAL TO ENHANCE TRADITIONAL SKILLS

**Digital art lab, teacher give BHS students real-world experience.**

A comic book assignment is helping to usher Burlington High School art students into the digital world.

"It's like two different projects going on at the exact same time," Anthony Onesto said, motioning to the students in his Illustration and Digital Art class, about half of whom sat at desks inking manga panels while the rest sat at computer monitors, their pens gliding across the screens to colorize hand-drawn illustrations that had been scanned into the computer.

Both Onesto and the 10 XP Pen

classrooms are new this year to BHS, whose art department previously had been equipped

with digital tablets that lacked displays and instead worked by transferring what was drawn

on them to a separate screen,

**See Digital on page 7**

## DIGITAL

Continued from page 6

making hand-eye coordination difficult.

"These are so nice," said sophomore Nora Bell, 15. "Oh my goodness, this is something so awesome because a lot of kids would never get a chance to use a tablet like this. It's really nice because this is like what people who do it as a job use. It gives kids experience with professional tools, and I think that's really important."

Onesto had brought the XP Pen monitors to Edward Stone, where he previously taught, and with the help of the Burlington Education Foundation and the district's IT department, introduced the same technology to BHS in an effort to grow what his predecessor had built.

"It's truly an animation lab," Onesto said. "We can do Pixar-level animation. Whether we get there in year one is another story, but right now, what I'm teaching them is that in comic books, or manga, a lot of things are done traditionally, which means they're hand-drawn or inked by hand or they're done on the computer, so I'm teaching them both techniques and the hybrid of drawing it on paper first, scanning it onto the scanner and inking and coloring their pages."

The manga assignment keeps at the forefront the importance of fundamental and traditional techniques and skills while using programs such as those in Adobe Creative Suite and free, open-source software like FireAlpaca and Krita, to enhance the traditional rather than override it.

"The technology is a tool to enhance their art, not replace

# BURLINGTON ARTISTS SHINE IN 2023 SCHOLASTIC ART AWARDS

Several Burlington students have been recognized in the 2023 Scholastic Art Awards.

Edward Stone eighth-grader Penelope Osbourne received a Gold Key for her oil pastel art piece and is moving on to the Regional and National part of the art competition that will be announced March 22.

BHS senior Ayla Cannon received Honorable Mention for her six-art piece portfolio, along with Honorable Mention for a Digital Art Piece with Color Pencils and an Honorable Mention for watercolor painting.

BHS junior Ashi Pennaka received Honorable Mention for a Digital Design art piece.

BHS sophomore Norah Bell received a Silver Key for a Digital Art piece. She was one place away from receiving an opportunity to earn a scholarship.

"Scholastic is a great tent pole on what the Burlington K-12 Art students can accomplish," BHS art teacher Tony Onesto said. "With more than 10,000 pieces received in Iowa, it is the hardest juried competition that we enter. We as a district and through continued support can compete with any district public or private in the state of Iowa."

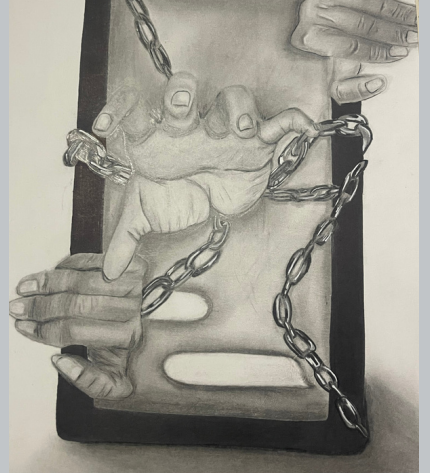

Here is an excerpt from an award letter:

"Since 1923, the Awards have recognized some of America's most celebrated artists and writers while they were teenagers, including Tschabalala Self, Stephen King, Kay WalkingStick, Amanda Gorman, Charles White, Joyce Carol Oates, and Andy Warhol. We are proud to count you among these esteemed Scholastic Awards alumni!"

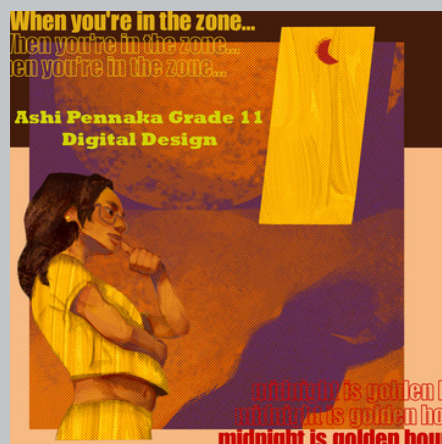

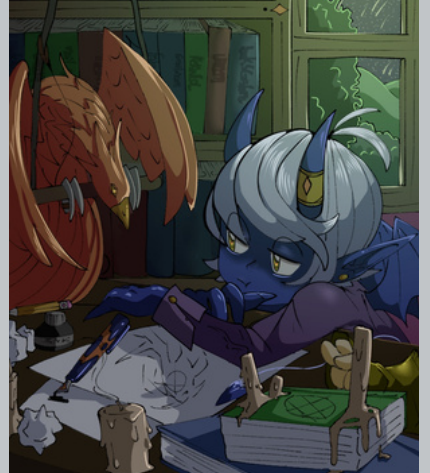

**Penelope Osbourne Grade 8 Oil Pastel**

**Ayla Cannon Grade 12 Graphite**

**Norah Bell Grade 10 Digital Art**

Continued on page 8

## DIGITAL

Continued from page 7

their art, because we still put a lot of emphasis on traditional,” Onesto said. “A lot of kids are losing the traditional techniques, which is affecting their digital abilities, so you still have to build the foundations traditionally and then the digital is the enhancement of those.”

The finished pieces will go into student portfolios.

“Another thing that’s kind of new this year is I’m making them all create a digital portfolio, so this way, it doesn’t matter whether they’re going to college or not. This will give them options,” Onesto said.

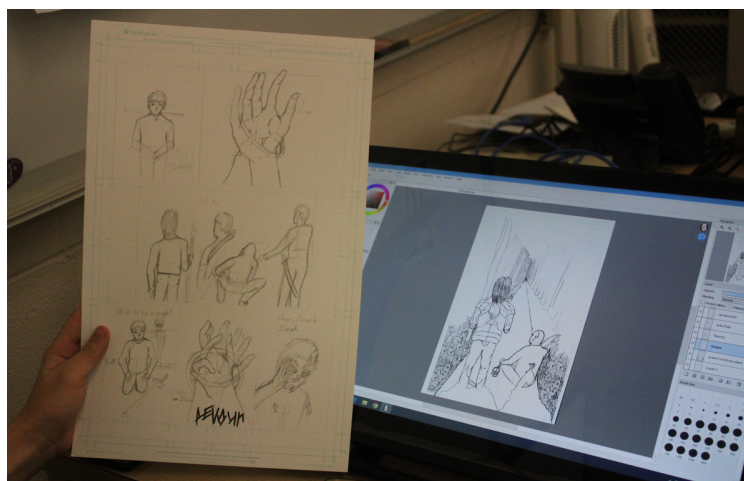

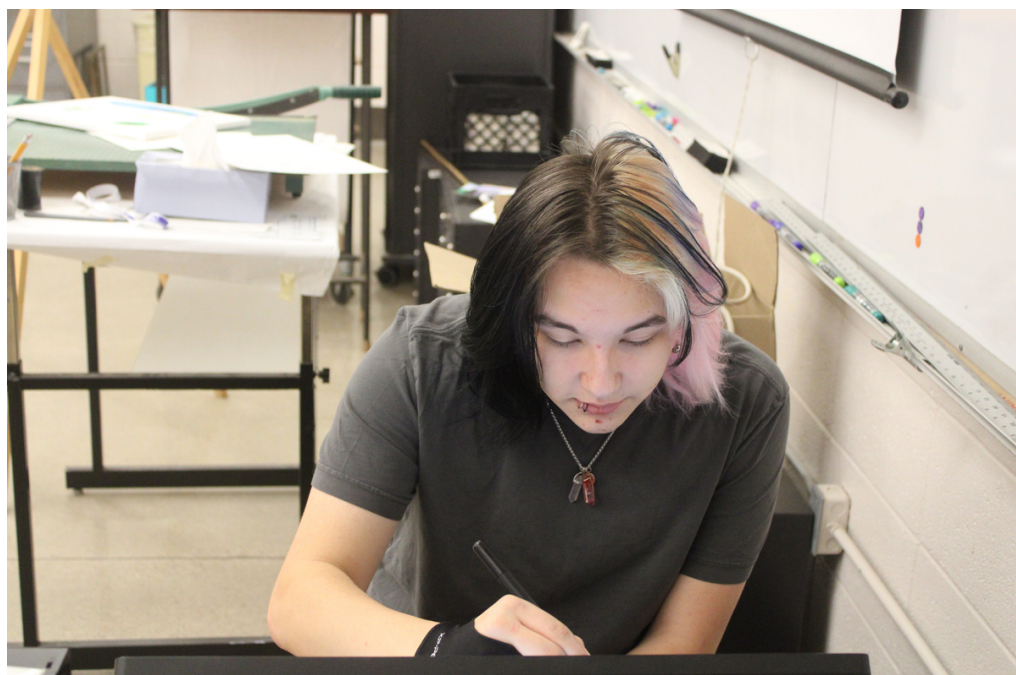

The portfolios also give them a way to track their progress.

“I always tell (students) even if it’s a terrible piece, even if it’s the worst thing they ever did, there had to be an idea behind it, and that’s why you save it is to use that idea so when their talent and their ability catches up to their creativeness, they can redo the piece the way they imagined it,” Onesto said.

“The more they learn — it’s not just getting them ready to be animators or college-bound, but if they want to take their art to the next level, if they want to get into tattooing, if they want to get into graphic design through community college, however it goes — it could lead to opportunities for students.”

And Onesto draws on his own experiences in helping to prepare students for those opportunities when they come knocking.

Onesto has worked with independent manga writers

**Junior Brock Brookhart, 17, uses an XP Pen and monitor to digitize his manga art Friday, Jan. 27, 2023, at Burlington High School. Students in Anthony Onesto’s Illustration and Digital Art class first draw their mangas by hand before digitizing them on the art department’s new computers.**

along with bigger names in the comic book industry. That work has included manga covers, style mimicry and helping artists to get over creative humps.

With each job came a contract, and Onesto plans to teach students about contract reading and writing so “when whoever wants to hire them for commission work or digital art or if they want signed contracts, these are the things that they look for.”

The benefits of Onesto’s experience are not lost by students.

Brock Brookhart, 17, a junior at BHS, took Illustration and Digital Art last year but decided

to take it again this year, along with an advanced placement art class.

“He revamped the class to be more suited to how I do things, so I’m retaking this class to further what I did,” Brookhart said, explaining his interest in manga art.

Onesto said the art department is a draw for students and noted that seniors who don’t have to take art are enrolling in art classes.

“A lot of seniors don’t have to take art, and not only are they taking art, but they’re taking extra classes just because they’ve been enjoying so many different things that

they’ve been teaching,” Onesto said.

BHS’ 2023-24 art courses include nine 2-D classes taught by Onesto, seven 3-D classes taught by Deborah Coyle, who also is new to BHS this year, and two AP classes.

“Burlington has an art department that’s second to none in the area, and students, they’ll get experiences you don’t normally get elsewhere,” Onesto said.

Find the full list of 2023-24 course offerings by visiting [bcsds.org/BHS](https://bcsds.org/BHS) and clicking on the 2023-2024 Program of Studies link.
